## Project Design Phase-II Data Flow Diagram & User Stories

| Date          | 07/11/2022   |
|---------------|--|
| Team ID       | PNT2022TMID13406                                     |
| Project Name  | Emerging Methods for Early Detection of Forest Fires |
| Maximum Marks | 4 Marks  |

## **Data Flow Diagrams:**

- 1.COLLECT DATA
- 2. EVALUATE DATA SET
- 3. IMPLEMENT ALGORITHMS
- 4. EVALUATE THE ACCURACY OF EACH ALGORITHMS
- 5. DISPLAY RESULTS

## **User Stories**

Use the below template to list all the user stories for the product.

| User Type        | Functional<br>Requirement<br>(Epic) | User Story<br>Number | User Story / Task   | Acceptance criteria   | Priority | Release  |
|------------------|-------------------------------------|----------------------|---|---|----------|----------|
| Environmentalist | Collect the data                    | USN-1                | As an Environmentalist, it is necessary to collect the data of the forest which includes temperature, humidity, wind and rain of the forest | It is necessary to collect<br>the right data else the<br>prediction may become<br>wrong     | High     | Sprint-1 |
|                  |                                     | USN-2                | Identify algorithms that can be used for prediction   | To collect the algorithm to identify the accuracy level of each algorithms                  | Medium   | Sprint-2 |
|                  |                                     | USN-3                | Identify the accuracy of each algorithms  | Accuracy of each algorithm-calculated so that it is easy to obtain the most accurate output | High     | Sprint-2 |
|                  |                                     | USN-4                | Evaluate the Dataset  | Data is evaluated before processing   | Medium   | Sprint-1 |
|                  |                                     | USN-5                | Identify accuracy,precision,recall of each algorithms   | These values are important for obtaining the right output                                   | High     | Sprint-3 |
|                  |                                     | USN-6                | Outputs from each algorithm are obtained  | It is highly used to predict the effect and to take precautionary measures.                 | High     | Sprint-4 |
